Language: python3

[Edit Code](#)

```
1 # Definition for singly-linked list.
2 # class ListNode:
3 #     def __init__(self, x):
4 #         self.val = x
5 #         self.next = None
6
7 class Solution:
8     def deleteNode(self, node):
9         """
10         :type node: ListNode
11         :rtype: void Do not return anything, modify node in-place instead.
12         """
13         node.val = node.next.val      # Replace input node with next node
14         node.next = node.next.next    # Set next node to the next next node
15
```
